A. Introduction

The information presented below in the Report on Risks, as required by the reporting directives of the Bank of Israel, includes disclosure requirements issued by the Basel Committee and risk disclosure requirements based on other sources, including disclosure requirements issued by the Financial Stability Forum (FSF) and disclosure requirements issued by a task force established by the Financial Stability Board (FSB) in order to improve risk disclosure at banking corporations.

This publication of the Report on Risks serves as a supplement and expansion of information accompanying the financial reporting of Bank Hapoalim B.M. on the subjects of risk and capital management. This report should be perused in conjunction with the Report on Risks: Pillar 3 Disclosure and Additional Information Regarding Risks as at December 31, 2017; the Annual Financial Statements for 2017 and the accompanying Notes; and the Condensed Financial Statements as at March 31, 2018, and the accompanying Notes.

A.1. Forward-looking information

Most of the information in this report that does not refer to historical facts (even if it is based on processing of historical data) constitutes forward-looking information, as defined in the Securities Law, 1968. The actual results of the Bank may differ materially from those included in forward-looking information, including, among other factors, as a result of changes in capital markets in Israel and globally, macro-economic changes, changes in geopolitical conditions, regulatory changes, accounting changes, changes in taxation rules, and other changes not under the Bank's control, which may lead to the failure of estimates to materialize and/or changes in the Bank's business plans. Forward-looking information is marked by words or phrases such as "forecast," "plan," "objective," "risk estimate," "scenario," "stress scenario," "risk assessment," "correlation," "distribution," "we believe," "expect," "predict," "estimate," "intends," "plans," "aims," "may change," "should," "can," "will," or similar expressions. Such forward-looking expressions involve risk and uncertainty, because they are based on management's estimates regarding future events, which include changes in the following parameters, among others: economic conditions, public tastes, interest rates in Israel and overseas, inflation rates, new legislation and regulation in the area of banking and the capital market, exposure to financial risks, the financial stability of borrowers, the behavior of competitors, aspects related to the Bank's image, technological developments, manpower-related matters, and other areas that affect the activity of the Bank and the environment in which it operates, the materialization of which is uncertain by nature. The information presented below is based, among other things, on information known to the Bank and based, among other things, on publications by various entities, such as the Central Bureau of Statistics, the Ministry of Finance, the Bank of Israel, the Ministry of Housing, and other entities that publish data and estimates regarding the Israeli and global capital markets.

This information reflects the Bank's current viewpoint with regard to future events, which is based on estimates, and is therefore subject to risks and uncertainty, as well as to the possibility that expected events or developments may not materialize at all or may only partially materialize, or even that actual developments may be the opposite of expectations.

A.2. Disclosure declaration

Pursuant to the instructions of the Bank of Israel, the disclosure declarations in the periodic financial report of the Bank are also valid for the Report on Risks – Pillar 3 Disclosure and Additional Information Regarding Risks. Within the discussions of the condensed financial statements of the Bank, the Board of Directors of the Bank approved the publication of the Report on Risks – Pillar 3 Disclosure and Additional Information Regarding Risks.

A.3. Applicability of implementation

The applicability of implementation refers to the working framework for the capital measurement and adequacy of Bank Hapoalim.

In general, the capital requirements of the Bank are based on its consolidated financial statements, which are prepared according to Israeli GAAP and the directives and guidelines of the Banking Supervision Department.

According to Israeli GAAP, subsidiaries controlled directly or indirectly by the Bank are consolidated in the financial statements, but different consolidation rules sometimes apply for the purposes of the supervision of capital. However, as at March 31, 2018, there are no differences between the consolidation base according to GAAP and the supervisory consolidation base for the purposes of capital adequacy.

There are no significant prohibitions or restrictions on the transfer of supervisory capital within the Group, with the exception of Bank Pozitif, for which any capital beyond the Pillar 1 requirements is not available at the level of the Group, and against which capital is therefore allocated within Pillar 2 calculations. With regard to the limits established in the Bank of Israel's permit for the acquisition of control of the Bank in connection with the distribution of retained earnings, see [Note 24 to the Financial Statements for 2017 and Note 9 to the Condensed Financial Statements as at March 31, 2018](#).

For further details regarding the principal subsidiary and affiliated companies of the Bank, see [Note 15C to the Financial Statements for 2017](#).

B. Review of risk management, principal supervisory ratios, and risk-adjusted assets

B.1. Risk assessment and management

The Bank's activity is accompanied by the following financial risks: credit risks (including concentration risk and counterparty risk), market risks (including exchange-rate risk and interest-rate risk in the banking book), investment risk (share and credit spread risk), and liquidity risk (including refinancing risk). Other non-financial risks are mainly compliance risk, legal risk, and operational risks. Additional risks to which the Bank is exposed are handled directly as part of the management of its business: reputational risk, competitive risk, regulatory and legislative risk, economic risk, strategic risk, and environmental risk.

The Bank has defined the following risks as material risks: credit risk, market risk, investment risk, compliance risk, operational risk, concentration risk, counterparty risk, interest-rate risk in the banking book, liquidity risk, reputational risk, strategic risk, and regulatory and legislative risk.

Risk management is performed based on a global view of the Bank's activity in Israel and of activity at the Bank's branches abroad, with due attention to the activity of subsidiaries with exposure significant for the Group. Risks are managed separately by each subsidiary in the Bank Group, according to policy formulated by each company's board of directors and presented to the Board of Directors of the Bank. The Bank manages the various risks while using hedges for some risks. Risk control and the assessment of financial risks and operational risks are performed based on a uniform methodology at the Group level, under the direction of the Risk Management Area, taking into account the unique characteristics of the activity of each subsidiary.

The Chief Risk Officer (CRO) and the member of the Board of Management responsible for the Risk Management Area until March 2018 was Mr. T. Cohen. Since March, Ms. R. Tal-Avrahami serves as acting Chief Risk Officer. In April 2018, the Board of Directors of the Bank resolved to appoint Dr. A. Bachar to the position of Chief Risk Officer and member of the Board of Management responsible for the Risk Management Area. This appointment will take effect subject to the approval of the Supervisor of Banks, when such approval is received.

Financial risks are managed by designated members of the Board of Management and under their responsibility. The principal members of the Board of Management responsible for managing credit risks until March 2018 were Mr. J. Orbach, Head of Corporate Banking, and Mr. R. Stein, Head of Retail Banking. As of March 2018, the member of the Board of Management responsible for the Corporate Banking Area is Mr. T. Cohen. The member of the Board of Management responsible for managing market, investment, and liquidity risks is Mr. D. Koller; Head of Financial Markets and International Banking. In April 2018, the Board of Directors of the Bank resolved to appoint Mr. Y. Antebi to the position of Head of Financial Markets and International Banking. This appointment will take effect subject to the approval of the Supervisor of Banks.

Legal risk was managed by the Chief Legal Advisor Attorney I. Mazur until March 2018, and is managed by Attorney Y. Almog since March 2018.

Technological risk is managed by Ms. E. Ben-Zeev, Head of Information Technology.

Operational risk, excluding legal risk and technological risk, is managed by each member of the Board of Management in the area of activity for which he or she is responsible.

For details and more extensive information regarding risk management governance, including the control approach, the responsible parties, and the committees of the Board of Directors and Board of Management relevant to risk management, see [the Report on Risks: Pillar 3 Disclosure and Additional Information Regarding Risks as at December 31, 2017](#).

Table B-I: Principal supervisory ratios

	On a consolidated basis, as at				
	March 31, 2018	December 31, 2017	September 30, 2017	June 30, 2017	March 31, 2017
	NIS millions/percent				
Available capital (in NIS millions)					
Common equity Tier I capital	36,637	36,582	36,347	36,245	35,731
Common equity Tier I capital before effect of transitional directives ⁽¹⁾	36,065	35,843	35,587	35,465	34,894
Tier I capital	37,614	37,803	37,568	37,466	36,952
Tier I capital before effect of transitional directives ⁽¹⁾	36,065	35,843	35,587	35,465	34,894
Total capital	46,630	47,531	47,927	47,839	47,490
Total capital before effect of transitional directives ⁽¹⁾	39,863	39,553	39,277	39,111	38,532
Risk-weighted assets (in NIS millions)					
Total risk-weighted assets (RWA)	331,539	324,772	322,689	319,225	318,701
Total risk-weighted assets (RWA) before effect of transitional directives ⁽¹⁾	332,337	325,616	323,586	320,175	319,704
Capital-adequacy ratios (in %) according to the directives of the Banking Supervision Department					
Common equity Tier I capital ratio	11.05%	11.26%	11.26%	11.35%	11.21%
Common equity Tier I capital ratio before effect of transitional directives ⁽¹⁾	10.85%	11.01%	11.00%	11.08%	10.91%
Tier I capital ratio	11.35%	11.64%	11.64%	11.74%	11.59%
Tier I capital ratio before effect of transitional directives ⁽¹⁾	10.85%	11.01%	11.00%	11.08%	10.91%
Total capital ratio	14.06%	14.64%	14.85%	14.99%	14.90%
Total capital ratio before effect of transitional directives ⁽¹⁾	11.99%	12.15%	12.14%	12.22%	12.05%
Common equity Tier I capital ratio required by the Banking Supervision Department ⁽²⁾	10.23%	10.23%	10.23%	10.20%	10.20%
Available common equity Tier I capital ratio beyond the requirement of the Banking Supervision Department ⁽²⁾	0.82%	1.03%	1.03%	1.15%	1.01%
Leverage ratios according to the directives of the Banking Supervision Department					
Total exposures (in NIS millions)	509,845	513,037	510,009	509,345	506,326
Total exposures (in NIS millions) before effect of transitional directives ⁽¹⁾	510,164	513,370	510,363	509,720	506,723
Leverage ratio (in %)	7.38%	7.37%	7.37%	7.36%	7.30%
Leverage ratio before effect of transitional directives (%) ⁽¹⁾	7.07%	6.98%	6.97%	6.96%	6.89%

(1) Before the effect of the transitional directives, including the effect of the adoption of US GAAP on employee benefits, and before the effect of Efficiency Plan Adjustments.

(2) Including a capital requirement at a rate representing 1% of the balance of housing loans at the dates of the financial statements.

Table B-1: Principal supervisory ratios (continued)

	For the three months ended				
	March 31, 2018	December 31, 2017	September 30, 2017	June 30, 2017	March 31, 2017
Liquidity coverage ratio according to the directives of the Banking Supervision Department					
Total high-quality liquid assets	108,592	111,047	115,275	116,466	116,017
Total net cash outflows	91,418	90,712	93,611	91,492	90,389
Liquidity coverage ratio (in %)	119%	122%	123%	127%	128%

B.2. Top and emerging risks

Based on the recommendations of the FSB (Financial Stability Board), a top risk is defined as a development currently occurring in the business environment of the Bank that may adversely affect the Bank's results over the course of the coming year. By contrast, with respect to an emerging risk, there is greater uncertainty regarding the timing of materialization of the risk as an occurrence with a material effect on the strategy of the Bank.

For details, see [the Report on Risks: Pillar 3 Disclosure and Additional Information Regarding Risks as at December 31, 2017](#).

For details regarding legal proceedings, see [Section 3.13 of the Report of the Board of Directors and Board of Management as at March 31, 2018](#).

C. Capital and leverage

C.1. Structure of supervisory capital and composition of capital

Capital measurement is based on the division of capital into Tier 1 capital (which includes common equity Tier 1 capital and additional Tier 1 capital) and Tier 2 capital.

For details regarding the structure of supervisory capital, the composition of capital, and limits on the structure of capital, see [the Report on Risks: Pillar 3 Disclosure and Additional Information Regarding Risks as at December 31, 2017](#).

C.1.a. Calculation of the capital ratio

Table C-1: Calculation of the ratio of capital to risk components

	March 31, 2018	March 31, 2017	December 31, 2017
	NIS millions		
1. Capital for the calculation of the capital ratio after supervisory adjustments and deductions			
Common equity Tier 1 capital ⁽¹⁾	36,637	35,731	36,582
Additional Tier 1 capital	977	1,221	1,221
Total Tier 1 capital ⁽¹⁾	37,614	36,952	37,803
Tier 2 capital	9,016	10,538	9,728
Total overall capital ⁽¹⁾	46,630	47,490	47,531
2. Weighted balances of risk-adjusted assets			
Credit risk ⁽²⁾	303,068	290,010	295,986
Market risks	4,692	5,174	5,114
Operational risk	23,779	23,517	23,672
Total weighted balances of risk-adjusted assets ⁽²⁾	331,539	318,701	324,772
	%		
3. Ratio of capital to risk components			
Ratio of common equity Tier 1 capital to risk components	11.05%	11.21%	11.26%
Ratio of Tier 1 capital to risk components	11.35%	11.59%	11.64%
Ratio of total capital to risk components	14.06%	14.90%	14.64%
Minimum common equity Tier 1 capital ratio required by the Banking Supervision Department ⁽³⁾	10.23%	10.20%	10.23%
Minimum total capital ratio required by the Banking Supervision Department ⁽³⁾	13.73%	13.70%	13.73%

(1) The data are presented in accordance with Proper Conduct of Banking Business Directive 202, "Capital Measurement and Adequacy – Supervisory Capital," and in accordance with the transitional directives established in Proper Conduct of Banking Business Directive 299. The data also include adjustments in respect of the efficiency plan, established based on the letter of the Banking Supervision Department of January 12, 2016, "Improvement of the operational efficiency of the banking system in Israel" (hereinafter: Efficiency Plan Adjustments), allocated in equal parts over five years, beginning in 2017. For additional details regarding the effect of the transitional directives and the Efficiency Plan Adjustments, see [Note 9 to the Condensed Financial Statements](#).

(2) A total of NIS 800 million as at March 31, 2018, NIS 853 million as at December 31, 2017, and NIS 1,013 million as at March 31, 2017, was deducted from the total weighted balances of risk-adjusted assets, due to Efficiency Plan Adjustments, which, in accordance with the approval of the Banking Supervision Department, are allocated gradually over five years, beginning in 2017.

(3) The minimum required common equity Tier 1 capital ratio and the minimum required total capital ratio are 10% and 13.5%, respectively. A capital requirement at a rate representing 1% of the balance of housing loans at the dates of the financial statements was added to these ratios.

Table C-2: Composition of capital for the purpose of calculating the ratio of capital to risk components

	March 31, 2018	March 31, 2017	December 31, 2017
	NIS millions		
Tier 1 capital			
Paid-up common share capital and premium	8,148	8,146	8,124
Retained earnings	28,849	27,392	28,465
Non-controlling interests in equity of consolidated subsidiaries	49	81	70
Unrealized profits from adjustments of securities available for sale to fair value	287	495	510
Other capital instruments	(628)	(323)	(531)
Amounts deducted from Tier 1 capital	(68)	(60)	(56)
Total common equity Tier 1 capital	36,637	35,731	36,582
Innovative hybrid instruments	977	1,221	1,221
Total Tier 1 capital	37,614	36,952	37,803
Tier 2 capital			
Hybrid capital instruments and subordinated notes	136	242	148
Collective allowances for credit losses before the effect of related tax	3,788	3,625	3,700
Tier 2 capital instruments issued by subsidiaries of the banking corporation to third-party investors	5,092	6,671	5,880
Amounts deducted from Tier 2 capital	-	-	-
Total Tier 2 capital	9,016	10,538	9,728
Total qualifying capital	46,630	47,490	47,531

For further details, see [Note 9 to the Condensed Financial Statements](#).

Table C-3: Composition of supervisory capital, by components, with references to the supervisory balance sheet

	March 31, 2018		March 31, 2017		December 31, 2017		References to the supervisory balance sheet

* After adjustments, as required in the transitional directives in Directive 299.

The changes in the components of supervisory capital in the first quarter of 2018 resulted primarily from net profit for the period, in the amount of NIS 628 million, which was offset by dividend distribution in the amount of NIS 245 million; unrealized losses from securities available for sale, in the amount of NIS 223 million; and a decrease in supervisory capital instruments, in the amount of NIS 1,044 million.

The changes in the components of supervisory capital in the first quarter of 2017 resulted primarily from net profit for the period, in the amount of NIS 767 million, which was offset by dividend distribution in the amount of NIS 41 million; unrealized profits from securities available for sale, in the amount of NIS 140 million; and a decrease in supervisory capital instruments, in the amount of NIS 1,313 million.

The changes in the components of supervisory capital in 2017 resulted primarily from net profit for the period, in the amount of NIS 2,660 million, which was offset by dividend distribution in the amount of NIS 861 million; unrealized profits from securities available for sale, in the amount of NIS 155 million; and a decrease in supervisory capital instruments, in the amount of NIS 2,198 million.

The data include Efficiency Plan Adjustments established based on the letter of the Banking Supervision Department of January 12, 2016, "Improvement of the operational efficiency of the banking system in Israel," allocated in equal parts over five years, beginning in 2017.

C.2. Capital adequacy

C.2.a. The Bank's approach to capital-adequacy assessment

The Bank applies the capital measurement and adequacy directives based on the Basel directives, as published by the Banking Supervision Department and as integrated into Proper Conduct of Banking Business Directives 201-211 and the file of questions and answers.

For more extensive information regarding the implementation of the Proper Conduct of Banking Business Directives and other requirements of the Banking Supervision Department concerning capital adequacy, and for more extensive information regarding capital adequacy management, see [the Report on Risks: Pillar 3 Disclosure and Additional Information Regarding Risks as at December 31, 2017](#).

C.2.b. Implementation and effect of new regulatory directives regarding capital measurement and adequacy

Improving operational efficiency

In January 2016, the Banking Supervision Department issued a letter on the subject, "Improving the operational efficiency of the banking system in Israel" (the "Efficiency Directive"). Pursuant to the Efficiency Directive, the boards of directors of banking corporations shall formulate a multi-year plan to improve efficiency. Banking corporations that meet the conditions established in the directive will be granted a relief allowing them to spread the effects of the plan over a period of up to five years in a straight line, for the purposes of the calculation of capital-adequacy ratios and of the leverage ratio. In October 2016, the Board of Directors of the Bank approved an efficiency plan at an estimated cost in the amount of NIS 762 million, net of tax effect, which was allocated to capital. The effect of the costs of the efficiency plan on capital-adequacy ratios, estimated at approximately 0.2% as at March 31, 2018, are being allocated in equal parts over five years, beginning in 2017.

Further to the Efficiency Directive, in June 2017, the Banking Supervision Department issued a letter entitled, "Improving the operational efficiency of the banking system in Israel – efficiency in the area of real estate," which encourages banking corporations to also examine, in addition to improved efficiency in personnel expenses, the possibility of reducing real-estate and maintenance costs of headquarters and management units, including through a reexamination of the geographical location of such units (hereinafter: "Real-Estate Efficiency"). In order to encourage the implementation of a plan for Real-Estate Efficiency, the Banking Supervision Department will approve reliefs for the banks in the area of capital adequacy. Pursuant to the additional letter, the term of the original letter has been extended until June 30, 2018.

Capital requirements in respect of debts secured by residential properties

On March 15, 2018, the Banking Supervision Department issued an update of Proper Conduct of Banking Business Directive 203 concerning debts secured by residential properties, pursuant to which loans fully secured by mortgages on residential properties at a financing rate higher than 60% would be weighted at a rate of 60%. The directive took effect on the date of its publication, and applies to loans secured by residential properties granted as of March 15, 2018.

C.2.c. Measurement of risk exposures and capital requirements

The measurement of exposures to the various risks may change, according to the volume and quality of the portfolio, methodological and regulatory changes, and changes in exchange rates, among other factors, and depending on the definition of the exposure: financial reporting according to GAAP, with the necessary adjustments to the Proper Conduct of Banking Business Directives for the calculation of capital requirements; establishment of supervisory capital; or the Bank's internal exposure management needs. Risk exposures presented below are based on the rules defined for the calculation of the supervisory capital required in order to support these risks.

Table C-6: Information regarding risk components and regulatory capital requirements in respect of credit risk, market risk, and operational risk (as noted in Proper Conduct of Banking Business Directives 201-209)

Ratio of common equity Tier I capital to risk-adjusted assets	11.05%		11.21%		11.26%	
Ratio of Tier I capital to risk-adjusted assets	11.35%		11.59%		11.64%	
Ratio of total capital to risk-adjusted assets	14.06%		14.90%		14.64%	
Minimum common equity Tier I capital ratio required by the Banking Supervision Department ⁽²⁾	10.23%		10.20%		10.23%	
Minimum total capital ratio required by the Banking Supervision Department ⁽²⁾	13.73%		13.70%		13.73%	

(1) The capital requirements were calculated in accordance with the minimum total capital ratio required by the Banking Supervision Department, at 13.73% as at March 31, 2018; 13.73% as at December 31, 2017; and 13.7% as at March 31, 2017. The following approaches are used at the Bank to calculate supervisory capital, with respect to the main risk categories: standardized approach (used for credit risks, market risks, operational risk, and securitization risk); present exposure approach (for counterparty credit risk); and calculation based on risk weights established in the Proper Conduct of Banking Business Directives (used in the calculation of other assets).

(2) The minimum required common equity Tier I capital ratio and the minimum required total capital ratio are 10% and 13.5%, respectively. A capital requirement at a rate representing 1% of the balance of housing loans at the dates of the financial statements was added to these ratios.

Sales ⁽⁴⁾	(101)	-	-	(101)
Effect of changes in exchange rates	645	-	-	645
Balance as at March 31, 2018	303,068	4,692	23,779	331,539

	For the three months ended March 31, 2017			
	Credit risk	Market risk	Operational risk	Total risk-adjusted assets
	NIS millions			
Balance as at December 31, 2016	290,139	4,866	23,374	318,379
Changes in portfolio volume ⁽¹⁾	2,022	308	143	2,473
Changes in portfolio quality ⁽²⁾	(79)	-	-	(79)
Changes in methodology and policy ⁽³⁾	(136)	-	-	(136)
Sales ⁽⁴⁾	(135)	-	-	(135)
Effect of changes in exchange rates	(1,801)	-	-	(1,801)
Balance as at March 31, 2017	290,010	5,174	23,517	318,701

	For the year ended December 31, 2017			
	Credit risk	Market risk	Operational risk	Total risk-adjusted assets
	NIS millions			
Balance as at December 31, 2016	290,139	4,866	23,374	318,379
Changes in portfolio volume ⁽¹⁾	8,373	248	298	8,919
Changes in portfolio quality ⁽²⁾	(195)	-	-	(195)
Changes in methodology and policy ⁽³⁾	(84)	-	-	(84)
Sales ⁽⁴⁾	(186)	-	-	(186)
Effect of changes in exchange rates	(2,061)	-	-	(2,061)
Balance as at December 31, 2017	295,986	5,114	23,672	324,772

(1) The category "changes in portfolio volume" refers to changes in the size of the portfolio, excluding changes resulting from change in the quality of the portfolio.

(2) The category "changes in portfolio quality" mainly refers to changes in the risk weight of transactions and customers resulting from changes in credit rating or classification.

(3) The category "changes in methodology and policy" mainly refers to the effect of changes in regulatory directives and changes in methodologies.

(4) The category "sales" includes the effect of sales of loans.

C.3. Leverage ratio

The Bank applies Proper Conduct of Banking Business Directive 218, "Leverage Ratio" (hereinafter: the "Directive"). The Directive establishes a simple, transparent, non-risk-based leverage ratio, which serves as a reliable measurement complementary to risk-based capital requirements, and which is designed to limit the accumulation of leverage at banking corporations.

The leverage ratio is expressed as a percentage, and is defined as the ratio of the capital measurement to the exposure measurement. Capital, for the purpose of measurement of the leverage ratio, is Tier I capital, as defined in Proper Conduct of Banking Business Directive 202, taking into consideration the transitional arrangements that have been established. The total exposure measurement is the total of balance sheet exposures, exposures to derivatives and to securities financing transactions, and off-balance sheet items.

Table C-9: Leverage ratio

	March 31, 2018	March 31, 2017	December 31, 2017
	NIS millions		
Consolidated data			
Tier I capital*	37,614	36,952	37,803
Total exposures*	509,845	506,326	513,037
	%		
Leverage ratio	7.38%	7.30%	7.37%
Minimum leverage ratio required by the Banking Supervision Department	6.00%	6.00%	6.00%

* These data also include Efficiency Plan Adjustments, established based on the letter of the Banking Supervision Department of January 12, 2016, "Improvement of the operational efficiency of the banking system in Israel." The effect of the costs of the efficiency plan on the leverage ratio as at March 31, 2018, estimated at approximately 0.12%, is allocated in equal parts over five years, beginning in 2017.

Table C-10: Comparison of balance sheet assets to exposure measurement, for the purposes of the leverage ratio

	March 31, 2018	March 31, 2017	December 31, 2017
	NIS millions		
Total consolidated assets as per published financial statements	448,195	445,847	454,424
Adjustment for investments in banking, financial, insurance, or commercial entities that are consolidated for accounting purposes but outside the scope of regulatory consolidation	-	-	-
Adjustment for fiduciary assets recognized on the balance sheet pursuant to the Public Reporting Directives, but excluded from the leverage ratio exposure measurement	-	-	-
Adjustments for derivative financial instruments ⁽¹⁾	(1,423)	(643)	(1,260)
Adjustments for securities financing transactions	-	-	-
Adjustments for off-balance sheet items	60,004	58,319	56,945
Other adjustments	3,069	2,803	2,928
Exposure for the purposes of the leverage ratio	509,845	506,326	513,037

(1) The data include the effects of the directive, "Capital Requirements in Respect of Exposure to Central Counterparties," which was implemented beginning January 1, 2017.

Table C-11: Leverage ratio disclosure

	March 31, 2018	March 31, 2017	December 31, 2017
	NIS millions/percent		
On-balance sheet exposures			
On-balance sheet items (excluding derivatives and securities financing transactions, but including collateral)	438,423	436,279	444,685

Total on-balance sheet exposures (excluding derivatives and securities financing transactions)	438,383	436,244	444,655
Derivative exposures			
Replacement cost associated with all derivatives transactions ⁽¹⁾	5,970	7,218	5,922
Add-on amounts for potential future exposure associated with all derivatives transactions	6,808	5,713	6,438
Gross-up for collateral provided in respect of derivatives deducted from balance sheet assets pursuant to the Public Reporting Directives	-	-	-
Deductions of receivables assets for cash variation margin provided in derivatives transactions	(2,051)	(1,439)	(1,728)
Exempted central counterparty leg of client-cleared trade exposures	-	-	-
Adjusted effective notional amount of written credit derivatives	123	127	121
Adjusted effective notional offsets and add-on deductions for written credit derivatives	-	-	-
Total derivative exposures	10,850	11,619	10,753
Securities financing transaction exposures			
Gross securities financing transaction assets (with no recognition of netting), after adjusting for sale accounting transactions	608	144	684
Netted amounts of cash payables and cash receivables of gross securities financing transaction assets	-	-	-
Central counterparty credit risk exposure for securities financing transaction assets	-	-	-
Agent transaction exposures	-	-	-
Total securities financing transaction exposures	608	144	684
Other off-balance sheet exposures			
Off-balance sheet exposure at gross notional amount	179,901	169,037	173,291
Adjustments for conversion to credit equivalent amounts	(119,897)	(110,718)	(116,346)
Off-balance sheet items	60,004	58,319	56,945
Capital and total exposures			
Tier I capital	37,614	36,952	37,803
Total exposures	509,845	506,326	513,037
Leverage ratio			
Leverage ratio pursuant to Proper Conduct of Banking Business Directive 218	7.38%	7.30%	7.37%

(1) The data include the effects of the directive, "Capital Requirements in Respect of Exposure to Central Counterparties," which was implemented beginning January 1, 2017.

D. Credit risk

Credit risk is the risk that a borrower or debtor may default on obligations to the Bank under a credit agreement.

The credit portfolio is a major component of the asset portfolio of the Bank Group; therefore, deterioration in the stability of the various borrowers may have an adverse effect on the Group's asset value and profitability.

For more extensive information regarding credit risk and the management thereof, see [the Report on Risks: Pillar 3 Disclosure and Additional Information Regarding Risks as at December 31, 2017; the Annual Financial Statements for 2017 and the accompanying Notes; and the Condensed Financial Statements as at March 31, 2018, and the accompanying Notes.](#)

D.1. Credit risk exposures

Table D-1: Segmentation of credit risk exposures by counterparty and by principal types of credit exposures, before allowance for credit losses⁽¹⁾

(1) After deduction of charge-offs, and before deduction of the allowance for credit losses on an individual and collective basis.

(2) Before conversion to credit of off-balance sheet components (e.g. weighting of unutilized credit facilities as credit), before credit risk mitigation as a result of the execution of certain actions (e.g. use of guarantees), and after offsetting of transactions in derivatives (netting).

(3) Including credit to the public, credit to the government, and deposits with central banks; after deduction of liabilities in respect of transactions in derivative instruments subject to CSA agreements.

(4) Not including bonds in the trading portfolio, and not including investments in capital of financial corporations.

(5) Positive fair value of derivatives, including the add-on reflecting the amount of the future potential exposure to credit in respect of the balance of the face value of derivative instruments, after offsetting of transactions in derivatives (netting). The data include the effects of the directive, "Capital Requirements in Respect of Exposure to Central Counterparties," which was implemented beginning January 1, 2017.

(6) Including cash, investments in financial corporations not deducted from capital, advance payments to tax authorities, shares, and other assets with no counterparty, such as buildings and equipment.

Table D-2: Total principal exposures to foreign countries⁽¹⁾

Balance sheet exposure to foreign countries as at March 31, 2018 amounted to NIS 52.2 billion, compared with NIS 58.4 billion at the end of 2017.

Off-balance sheet exposure to foreign countries as at March 31, 2018 amounted to NIS 26.6 billion, compared with NIS 25.7 billion at the end of 2017.

The Bank operates in accordance with an ordered policy that sets limits and terms for the exposure to foreign countries.

	March 31, 2018		March 31, 2017		December 31, 2017	
	Total balance sheet exposure ⁽²⁾	Total off-balance sheet exposure ⁽²⁾⁽³⁾⁽⁴⁾	Total balance sheet exposure ⁽²⁾	Total off-balance sheet exposure ⁽²⁾⁽³⁾⁽⁴⁾	Total balance sheet exposure ⁽²⁾	Total off-balance sheet exposure ⁽²⁾⁽³⁾⁽⁴⁾
NIS millions						
Country						
United States	24,150	7,505	26,811	8,017	30,809	7,610
Europe*	15,441	15,633	19,728	15,690	15,259	15,793
Others	12,573	3,494	14,129	2,758	12,379	2,342
Total exposures to foreign countries	52,164	26,632	60,668	26,465	58,447	25,745
Of which: total exposure to PIIGS (Portugal, Ireland, Italy, Greece, and Spain)	229	253	283	371	202	134
Of which: total exposure to LDCs	1,977	778	1,567	906	1,871	757

The line "total LDCs" includes the total exposure to countries defined as Less Developed Countries (LDCs) in Proper Conduct of Banking Business Directive 315, "Supplementary Provision for Doubtful Debts."

Balance sheet exposure to a foreign country includes cross-border balance sheet exposure and balance sheet exposure of the branches/subsidiaries of the banking corporation in the foreign country to local residents. Cross-border balance sheet exposure includes balance sheet exposure of the branches/subsidiaries of the banking corporation in Israel to residents of the foreign country, and balance sheet exposure of the overseas branches/subsidiaries of the banking corporation to non-residents of the country in which the branch/subsidiary is located.

Balance sheet exposure of the banking corporation's branches/subsidiaries in a foreign country to local residents includes balance sheet exposure of the branches/subsidiaries of the banking corporation in that foreign country to the residents of the country, less liabilities of those branches/subsidiaries (the deduction is performed up to the level of the exposure).

* Information regarding total exposures to foreign countries, and exposures to countries total exposure to each of which constitutes more than 1% of total balance sheet assets or 20% of capital, whichever is lower:

- (1) Based on the final risk, after the effect of guarantees, liquid collateral, and credit derivatives.
- (2) Balance sheet and off-balance sheet credit risk, problematic credit risk, and impaired debts are presented before the effect of the allowance for credit losses, and before the effect of collateral deductible for the purposes of the indebtedness of a borrower and of a group of borrowers.
- (3) Credit risk in off-balance sheet financial instruments, as calculated for the purpose of the limits on indebtedness of a borrower, according to Proper Conduct of Banking Business Directive 313.
- (4) The balance of the off-balance sheet exposure to foreign countries includes a total of NIS 12,808 million in respect of the acquisition of insurance for the portfolio of Sale Law guarantees from international reinsurers (December 31, 2017: NIS 13,705 million).

Credit risk in respect of exposure to borrower groups

Table D-8: Details of credit risk balances for each group of borrowers whose net indebtedness on a consolidated basis exceeds 15% of the capital of the banking corporation (as defined in Directive 313)

	Balance sheet credit risk ⁽¹⁾	Off-balance sheet credit risk ⁽¹⁾	Of which: off-balance sheet credit risk in respect of derivative instruments ⁽²⁾	Gross indebtedness ⁽³⁾	Deductions ⁽⁴⁾	Net indebtedness ⁽⁵⁾	Percentage of regulatory capital
NIS millions							
Borrower group A	4,117	2,713	317	6,837	99	6,738	16.26%

- (1) After deduction of the balance of charge-offs and the allowance for credit losses calculated on an individual basis.
(2) Off-balance sheet credit risk in respect of derivative instruments, as calculated for the purposes of the limits on indebtedness of borrowers and of borrower groups.
(3) This amount includes third-party guarantees outside the group.
(4) Deductions permitted under Directive 313, mainly including deposits deposited at the Bank, bonds issued by the State of Israel, and deductible indemnity letters of the State of Israel or financial institutions.
(5) The data presented above represent exposure to borrower groups, and are stated after the permitted deductions pursuant to Directive 313, and after deduction of the allowance for credit losses calculated on an individual basis. These data are therefore not comparable with data regarding borrowers' indebtedness provided in other disclosures in the report.

D.1.c. Credit to private individuals (excluding housing)

Table D-9: Balance of credit to private individuals in Israel

	Balance as at		Change	
	March 31, 2018	December 31, 2017		%
	NIS millions			
Balance sheet				
Negative balance in current accounts	3,399	3,525	(126)	(3.57%)
Loans ⁽¹⁾	33,478	33,677	(199)	(0.59%)
Of which: bullet and balloon loans	128	147	(19)	(12.93%)
Credit for purchases of motor vehicles ⁽²⁾	4,802	4,756	46	0.97%
Debtors in respect of credit-card activity	13,196	12,697	499	3.93%
Total balance sheet credit risk	54,875	54,655	220	0.40%
Off-balance sheet				
Off-balance sheet credit risk	30,965	31,063	(98)	(0.32%)
Total credit risk	85,840	85,718	122	0.14%

- (1) Excluding loans for purchases of motor vehicles.
(2) Including loans granted for the purchase of motor vehicles or with a lien on a motor vehicle.

In the first quarter of 2018, the balance of loans to private individuals in Israel, including credit for the purchase of motor vehicles, decreased by 0.4%. Total balance sheet credit increased by 0.36%.

The percentage of problematic credit risk rose in the first quarter of 2018, while impaired credit risk decreased, due, among other factors, to the initial implementation of the automatic classification of debts lower than NIS 1 million as under special supervision, based on established fixed criteria, which led to an increase in the balance of problematic debts of private individuals.

Table D-10: Information regarding problematic debts in respect of private individuals in Israel

	Balance as at		Change	Percentage of total balance sheet credit risk	
	March 31, 2018	December 31, 2017		March 31, 2018	December 31, 2017
	NIS millions				
Problematic credit risk	1,118	1,073	4.19%	2.04%	1.96%
Of which: impaired credit risk	715	738	(3.12%)	1.30%	1.35%
Debts in arrears of more than 90 days	92	97	(5.15%)	0.17%	0.18%
Net charge-offs	129	479	⁽¹⁾ 7.72%	⁽¹⁾ 0.94%	0.88%
Allowance for credit losses	1,092	1,071	1.96%	1.99%	1.96%

(1) Calculated on an annualized basis.

The rate of debts in arrears of more than 90 days decreased moderately. The rate of net charge-offs and the rate of the allowance for credit losses are higher than in December 2017. These data, particularly the rate of net charge-offs, indicate a decrease in the quality of this portfolio, which was also apparent in 2017 and 2016. The Bank has taken several measures to improve the quality of underwriting in credit to private individuals, and is examining the application of additional measures.

For further details, see the section "Credit risk" in the "Review of risks" [in the Report of the Board of Directors and Board of Management as at March 31, 2018](#).

D.1.d. Risks in the housing loan portfolio

Table D-11: Development of the balance in the housing credit portfolio, by linkage base and as a percentage of the balance in the credit portfolio of the Bank

	Unlinked segment				CPI-linked segment				Foreign-currency segment		Total	
	Fixed interest rate		Floating interest rate		Fixed interest rate		Floating interest rate		Floating interest rate		Recorded debt balance in NIS millions	Rate of change during the period
	Balance in NIS millions	Rate in %	Balance in NIS millions	Rate in %	Balance in NIS millions	Rate in %	Balance in NIS millions	Rate in %	Balance in NIS millions	Rate in %		
March 31, 2018	13,026	17.1%	28,834	37.9%	12,975	17.1%	20,751	27.3%	419	0.6%	76,005	2.0%
Dec. 31, 2017	12,455	16.7%	28,022	37.6%	12,988	17.4%	20,619	27.7%	437	0.6%	74,521	7.6%

Risk quantification and measurement – housing credit portfolio

The Bank routinely monitors developments in the housing credit portfolio, and applies various measures to manage risk. Housing credit risks are examined individually, based on the policies and objectives established in the risk appetite set for housing credit, from the level of the individual transaction to an overview of the housing credit portfolio of the Bank.

Risk hedging: The Bank manages and hedges risk, among other means, through limits on various segments, as established in policy discussions of the Board of Management and the Board of Directors, overseen and led by the Risk Management Area. The limits address LTV rates, repayment capability, distribution of credit products in the portfolio, volume of problematic debt, loan durations, geographical distribution, rate of arrears, etc. These indicators are also monitored in comparison to the data of the banking system as a whole.

The Bank tracks conditions and changes in macro-economic indicators in general, and in the business environment of the industry in particular. Some events require a reexamination of policy, such as a sharp increase in the floating interest rate or in inflation, an increase in unemployment in the Israeli economy, and a material change in housing prices. Data are reported on a monthly basis in an Area-level risk forum headed by the Head of Retail Banking, and on a quarterly basis as part of the report on developments in the credit portfolio and in credit risk to the Board of Management and Board of Directors.

The Bank uses a statistical model to measure the probability of default and the expected loss in the mortgage portfolio. In addition, stress scenarios are applied to the mortgage portfolio, and the effect on the portfolio and on the Bank as a whole is analyzed. These scenarios include a sharp decline in prices of homes, an increase in the interest rate, and an increase in the unemployment rate. In addition, insurance arrangements are in place (life insurance and building insurance).

Table D-12: Details of characteristics of housing credit granted by the Bank – percentage of total new loans executed

	For the three months ended				
	March 31, 2018	December 31, 2017	September 30, 2017	December 31, 2017	March 31, 2017
Characteristics					
Financing rate over 60%	29.6%	28.5%	28.2%	26.6%	26.1%
Ratio of repayment to income greater than 40% (for acquisition and in monthly payments)	0.0%	0.0%	0.0%	0.0%	0.0%
Percentage with floating interest rates varying at a frequency of less than 5 years	31.5%	31.2%	32.2%	31.5%	30.7%
Percentage with floating rates	58.1%	56.5%	57.5%	57.8%	56.8%
Percentage of all-purpose loans	6.2%	7.7%	6.3%	6.2%	5.9%
Loans for investment purposes as a percentage of acquisition	10.8%	10.3%	11.5%	11.5%	11.3%
Principal planned for repayment after age 67 (excluding investments)	7.1%	7.0%	6.6%	6.4%	6.5%
Average new credit facility for purchases of homes, in NIS thousands	734	732	720	704	697
Average original term to maturity of loans for purchases of homes, in years (excluding bridge loans)	23.9	23.6	23.7	23.9	23.8

Note that financing rates were calculated pursuant to Reporting Directive 876 of the Banking Supervision Department, "Report on Housing Loans."

The upward trend in the percentage of credit granted with a financing rate greater than 60% continued in the first quarter of 2018. In addition, loans for investment as a percentage of acquisitions increased, and the percentage of principal scheduled for repayment above the age of 67 (excluding investments) increased.

The percentage of loans granted with payments higher than 40% of income remains near zero; the rate of all-purpose loans granted decreased.

The average term to maturity of loans for purchases of homes (excluding bridge loans) has continued to increase.

D.1.e. Leveraged financing

Leveraged financing is managed and defined at the Bank in accordance with the directives of the Bank of Israel, and in particular; with Proper Conduct of Banking Business Directive 31 I (Credit Risk Management), Proper Conduct of Banking Business Directive 323 (Limits on Financing of Equity Transactions), and Proper Conduct of Banking Business Directive 327 (Management of Leveraged Loans).

Data regarding credit risks of leveraged financing follow. The disclosure focuses on exposures in respect of leveraged borrowers/transactions where the credit balance exceeds the amount of 0.5% of Tier 1 capital.

Table D-13: The Bank's exposures to leveraged financing, by economic sector of the borrower

Economic sector of the borrower	March 31, 2018

Total	8	3,229	1,026	4,255

D.2. Credit risk mitigation: standardized approach disclosures

The Bank applies the comprehensive standardized approach in order to determine risk weightings to apply to the counterparty. The standardized approach requires the use of independent ratings prepared by international rating agencies.

The following tables present details of gross credit exposure, after deducting the allowance for credit losses on an individual basis, by risk weightings, with segmentation of the exposure by counterparty (segments), before and after credit risk mitigation in respect of recognized collateral.

Table D-14: Amount of gross credit exposures before credit risk mitigation

E. Counterparty credit risks

Counterparty risk – The credit risk arising from transactions in derivative financial instruments is the risk that the counterparty to the transaction will default before the final settlement of cash flows in the derivatives transaction. The market value of the transaction may be positive or negative for any of the parties to the transaction; the market value is not certain, and may change over time and according to movements in the underlying market factors.

For more extensive information regarding counterparty credit risk and the management thereof, see [the Report on Risks: Pillar 3 Disclosure and Additional Information Regarding Risks as at December 31, 2017](#).

	Banking book		Total face value of credit derivatives
	Protection acquired	Protection sold	
Credit derivatives	50	121	171

The Bank is not a party to CDS transactions originating in intermediary activities.

F. Market risk

Market risk is the risk of loss or decline in value as a result of change in the economic value of a financial instrument, or of a particular portfolio, due to changes in prices, rates, spreads, and other market parameters.

The main risk factors to which the Bank is exposed are NIS interest rates in the linked and unlinked segments, inflation, the NIS/USD exchange rate, and spreads between different interest-rate curves. Interest-rate risk in the banking book and investment risk (exposure to share prices and credit spreads) are described below, in separate sections.

For more extensive information regarding market risks and the management thereof, see [the Report on Risks: Pillar 3 Disclosure and Additional Information Regarding Risks as at December 31, 2017](#); [the Annual Financial Statements for 2017 and the accompanying Notes](#); and [the Condensed Financial Statements as at March 31, 2018, and the accompanying Notes](#).

F.1. Market risk estimates

Table F-1: Risk estimates of trading activity (VaR)

	March 31, 2018	Average in 2018
	NIS millions	
Total trading in dealing rooms	14	14
	December 31, 2017	Average in 2017
	NIS millions	
Total trading in dealing rooms	9	16

Table F-2: Sensitivity of the Bank to changes in the exchange rates of foreign currencies with a significant volume of activity at the Bank and to the consumer price index

	March 31, 2018		December 31, 2017	
	NIS millions			
	10% increase	10% decrease	10% increase	10% decrease
USD	103.3	(9.1)	100.4	(68.2)
EUR	51.7	(69.3)	(1.8)	(26.8)
	3% increase	3% decrease	3% increase	3% decrease
CPI	227.6	(227.6)	187.1	(187.1)

The table above presents an analysis of the sensitivity of the economic value of the Bank to changes in exchange rates, based on revaluation of all balance sheet and off-balance sheet instruments in the risk-management system, using prevalent models for revaluation of each instrument and representative rates as the baseline exchange rate. For the purposes of the calculation, the portfolio is revalued again at an exchange rate reflecting an increase/decrease at the presented rate, with no additional assumptions. Sensitivity to the consumer price index is calculated according to the exposure of the Bank to the index, as detailed in Note 14 to the Condensed Financial Statements as at March 31, 2018.

Table F-3: Capital requirements in respect of market risks

The Bank is required to maintain a minimum capital ratio in respect of market risks, on the basis of a standardized model defined by the Bank of Israel. The regulatory capital adequacy is calculated for interest-rate and share risks in the areas of trading alone, as defined above, and for currency risks in the banking book and in the trading book.

	March 31, 2018 ⁽¹⁾			March 31, 2017 ⁽¹⁾			December 31, 2017 ⁽¹⁾		
	Specific risk	General risk	Total	Specific risk	General risk	Total	Specific risk	General risk	Total
	NIS millions								
Interest-rate risk	1	406	407	1	403	404	1	377	378
Share risk	6	6	12	8	8	16	9	9	18
Foreign currency exchange-rate risk	-	125	125	-	115	115	-	124	124
Option risk	-	100	100	-	174	174	-	182	182
Total	7	637	644	9	700	709	10	692	702

(1) The capital requirements were calculated in accordance with the minimum total capital ratio required by the Banking Supervision Department, at 13.73% as at March 31, 2018; 13.73% as at December 31, 2017; and 13.7% as at March 31, 2017. The required minimum total capital ratio is 13.5%. A capital requirement at a rate representing 1% of the balance of housing loans at the dates of the financial statements was added to this ratio.

F.2. Interest-rate risk in the banking book

Interest-rate risk in the banking book refers to the potential effect of changes in the various interest-rate curves on the economic value of the Bank (i.e. change in the present value of assets and liabilities) and/or on net interest income (accounting income sensitivity). The risk emerges during the routine and proactive banking activity of the Bank, as a result of the provision of routine services to the general public and to the business and financial sectors, and from other activities; this includes interest-rate exposure arising from the management of the investment portfolio. The risk arises from differences in the structure of assets and liabilities – gaps between segments, durations, interest bases, interest-rate renewal dates, and more.

For additional information regarding interest-rate risk and the management thereof, see [the Report on Risks: Pillar 3 Disclosure and Additional Information Regarding Risks as at December 31, 2017](#); [the Annual Financial Statements for 2017 and the accompanying Notes](#); and [the Condensed Financial Statements as at March 31, 2018, and the accompanying Notes](#).

Table F-4: Sensitivity of the capital of the banking book to parallel changes in interest-rate curves (theoretical change in economic value as a result of each scenario)

	March 31, 2018			Maximum in 2018		Minimum in 2018	
	1% increase	1% decrease	0.1% increase	1% increase	1% decrease	1% increase	1% decrease
NIS millions							
Scenario:							
Change in CPI-linked interest rate	(485)	568	(52)	(485)	568	(370)	435
Change in unlinked interest rate	(66)	111	(8)	(208)	255	(66)	111
Change in foreign-currency interest rates	65	(68)	7	65	(69)	1	1

	December 31, 2017			Maximum in 2017		Minimum in 2017	
	1% increase	1% decrease	0.1% increase	1% increase	1% decrease	1% increase	1% decrease
NIS millions							
Scenario:							
Change in CPI-linked interest rate	(406)	477	(43)	(406)	476	(257)	315
Change in unlinked interest rate	(260)	311	(28)	(260)	311	(54)	92
Change in foreign-currency interest rates	-	3	-	(38)	41	-	2

The above table presents an analysis of the sensitivity of the economic value of the banking book to changes in interest-rate curves, based, among other factors, on the discounting of expected cash flows by an interest-rate curve that does not take into account the credit risk spread of the counterparty, with the use of internal models for some products. This differs from a fair-value calculation, which is based on factors including the discounting of expected cash flows by interest rates reflecting the risk levels, according to the accepted practice in financial statements, without the use of internal models for some products.

F.3. Share and credit spread risk: investment risk

Investment risk is defined at the Bank as exposure to the stock market, to credit spreads, and to credit risk in the bond and stock markets in the banking book of the Group (as a result of holdings in these products, the Bank may also be exposed to interest-rate risks and/or currency risks and/or liquidity risks, which are managed separately). According to the definition at the Bank, Israeli government bonds in NIS and in foreign currency and government bonds of the country in which a branch/subsidiary operates, held by the branch/subsidiary, do not bear investment risk, and are therefore not included in the measurement of investment risk at the Bank.

For more extensive information regarding share and credit spread risk (investment risk) and the management thereof, see [the Report on Risks: Pillar 3 Disclosure and Additional Information Regarding Risks as at December 31, 2017](#); [the Annual Financial Statements for 2017 and the accompanying Notes](#); and [the Condensed Financial Statements as at March 31, 2018, and the accompanying Notes](#).

Table F-5: Details of the Bank's investments in shares in the banking book

	March 31, 2018		March 31, 2017		December 31, 2017	
	Balance sheet value and fair value	Capital requirements ⁽¹⁾	Balance sheet value and fair value	Capital requirements ⁽¹⁾	Balance sheet value and fair value	Capital requirements ⁽¹⁾
NIS millions						
Investments classified into the trading portfolio	44	⁽²⁾ 12	61	⁽²⁾ 16	67	⁽²⁾ 18
Investments classified into the available-for-sale portfolio	2,065	314	2,225	333	2,159	326
Total investments in shares	2,109	326	2,286	349	2,226	344
Of which:						
Traded on a stock exchange	1,139		1,436		1,378	
Privately held	970		850		848	
Unrealized gains included in supervisory capital	257		302		320	

(1) The capital requirements were calculated in accordance with the minimum total capital ratio required by the Banking Supervision Department, at 13.73% as at March 31, 2018; 13.73% as at December 31, 2017; and 13.7% as at March 31, 2017. The required minimum total capital ratio is 13.5%. A capital requirement at a rate representing 1% of the balance of housing loans at the dates of the financial statements was added to this ratio.

(2) Including capital allocation with respect to specific market risk and general market risk.

For details regarding investments of the Bank, see [Note 5 to the Condensed Financial Statements as at March 31, 2018](#).

G. Liquidity risk

Liquidity risk – Liquidity risk is defined as present or future risk to the stability and profits of the Bank arising from an inability to sustain the cash flow required for its needs. Liquidity risk at the Bank is examined from a broader perspective, encompassing the ability to repay liabilities on schedule, including during times of stress, without damage to routine operations within the business plans of the Bank and without incurring exceptional losses.

Refinancing risk – The risk of inability to raise new resources to replace resources that have matured, or the risk that the reissue may be performed at durations and terms that damage the Bank's net interest income. This risk is managed as part of liquidity risk. In light of the financing sources of the Bank, the Bank does not view this risk as a material risk in its own right. The Bank accords high importance to raising resources that are stable and highly diversified.

Table G-1: Liquidity coverage ratio – limited banking corporation and consolidated subsidiaries, for the three-month period

	For the quarter ended March 31, 2018	
	Total unweighted value*	Total weighted value**
	NIS millions	
Total high-quality liquid assets		
Total high-quality liquid assets (HQLA)		108,529
Cash outflows		
Retail deposits from individuals and from small business customers, of which:	186,550	14,541
Stable deposits	60,600	3,030
Less stable deposits	89,774	10,426
Deposits for a period greater than 30 days (Section 84 of Proper Conduct of Banking Business Directive 221)	36,176	1,085
Unsecured wholesale financing, of which:	114,794	75,171
Operational deposits (all counterparties) and deposits in networks of cooperative banks	1,673	418
Non-operational deposits (all counterparties)	112,105	73,737
Unsecured debts	1,016	1,016
Secured wholesale financing	51	-
Additional liquidity requirements, of which:	106,592	22,302
Outflows related to derivative exposure and other collateral requirements	14,973	13,240
Outflows related to loss of funding on debt products		
Credit and liquidity facilities	91,619	9,062
Other contractual funding obligations	14,341	14,341
Other contingent funding obligations	57,857	1,894
Total cash outflows		128,249
Cash inflows		
Secured lending (e.g. reverse repos)	588	588
Inflows from fully performing exposures	31,068	23,733
Other cash inflows	16,831	12,510
Total cash inflows	48,487	36,831
		Total adjusted value***
Total high-quality liquid assets (HQLA)		108,529
Total net cash outflows		91,418
Liquidity coverage ratio (%)		119%

* Unweighted values were calculated as outstanding balances maturing or callable within 30 days (for inflows and outflows), based on an average of daily observations.

** Weighted values were calculated after the application of respective haircuts or inflow and outflow rates (for inflow and outflow), based on an average of daily observations.

*** Adjusted values were calculated after the application of: (1) haircuts and inflow and outflow rates; and (2) any applicable caps (i.e. caps on level 2B and level 2 assets for HQLA and a cap on inflows).

Liquidity coverage ratio (%)		122%

* Unweighted values were calculated as outstanding balances maturing or callable within 30 days (for inflows and outflows), based on an average of daily observations.

** Weighted values were calculated after the application of respective haircuts or inflow and outflow rates (for inflow and outflow), based on an average of daily observations.

*** Adjusted values were calculated after the application of: (1) haircuts and inflow and outflow rates; and (2) any applicable caps (i.e. caps on level 2B and level 2 assets for HQLA and a cap on inflows).

The Bank calculates its stand-alone and consolidated liquidity ratios daily, with a division into NIS and foreign currency, and monitors this ratio at its subsidiaries (which are required to comply with internal liquidity limits adapted to the nature of their activity). These ratios are reported as an average of the daily observations. The number of observations used to calculate the averages in the reported quarter is 62. Credit-card companies are exempt from independent calculations, but are included in the consolidated data.

The average ratio during the quarter (the average of the daily observations) is 119%, consolidated, and 116% for the stand-alone banking corporation, while the minimum requirement is 100%. This ratio decreased slightly during the quarter, in comparison to the preceding quarter. The decrease mainly resulted from shortening of instruments issued by the Bank and the entry of such instruments into the range of up to 30 days, and from an increase in credit. There is some volatility from day to day during the month, and some interchange between NIS and foreign currency, mainly due to activity in derivatives.

The Bank is in compliance with all regulatory and internal liquidity limits. These include, among others, short-term models such as the LCR and an internal thirty-day model, medium-term models such as the NSFR-like internal model (financing sources stable for over a year divided by financing needs stable for over a year, as defined at the Bank, in the vein of the recommendations of the Basel Committee), and limits that refer to the long term. In accordance with Proper Conduct of Banking Business Directive 221, as at March 31, 2018, the Bank holds consolidated liquid assets (primarily reserves at central banks, tradable securities backed by sovereigns and central banks, and coins and bills) for times of crisis (after haircuts) in the amount of NIS 103,047 million, in addition to liquid bonds not recognized for the purposes of the calculation of liquid assets. Part of the liquid assets are held by the Bank, and part are held by the subsidiaries. The Bank takes into consideration possible restrictions on the transfer of liquidity between some subsidiaries and the Bank itself, particularly banking subsidiaries overseas. Accordingly, some of the subsidiaries hold liquid assets for times of crisis (or a credit line from the parent company), according to need, and the Bank does not rely on these assets. In light of the assumptions regarding rollover of deposits in the ordinary course of business, and other assumptions, the Bank does not foresee liquidity problems that would necessitate the use of the liquid assets; however, it is prepared for the required scenarios.

For additional information regarding liquidity risk and the management thereof, see [the Report on Risks: Pillar 3 Disclosure and Additional Information Regarding Risks as at December 31, 2017](#); [the Annual Financial Statements for 2017 and the accompanying Notes](#); and [the Condensed Financial Statements as at March 31, 2018, and the accompanying Notes](#).

Table G-2: Details of liquid assets, by level, as required in the Basel directives

	Balance as at March 31, 2018	Average in the quarter ended March 31, 2018
	NIS millions	
Level 1 assets	102,333	107,796
Level 2A assets	561	557
Level 2B assets	153	176
Total HQLA	103,047	108,529

	Balance as at March 31, 2017	Average in the quarter ended March 31, 2017
	NIS millions	
Level A assets	112,329	115,186
Level B1 assets	496	479
Level B2 assets	321	352
Total HQLA	113,146	116,017

	Balance as at December 31, 2017	Average in the quarter ended December 31, 2017
	NIS millions	
Level A assets	113,583	110,254
Level B1 assets	605	585
Level B2 assets	202	208
Total HQLA	114,390	111,047

A regulatory limit applies in Switzerland and in New York to the use of the liquidity reserve of these entities. The Bank's scenarios assume the use of liquidity of the subsidiaries / New York branch, taking the limits of each entity into consideration.

** Includes surplus pledges.

H. Operational risk

Operational risk is defined as the risk of loss that may be caused by failed or faulty internal processes, human actions, system malfunctions, or external events. The definition includes legal risk, but does not include strategic risk or reputational risk. Failures related to one of the aforesaid factors may cause damage to profitability. The Bank operates control units, including Information Systems Security and Cyber Defense, Business Continuity, Security, the Compliance Officer, and Anti-Money Laundering and Terrorism Financing Prevention, as well as comprehensive procedures and systems in areas related to banking activity, management of human resources, process control, emergency operation, and more.

For additional information regarding operational risk and the management thereof, including information-technology risk, information security and cyber risks, cloud-computing risks, emergency preparedness, and insurance, see [the Report on Risks: Pillar 3 Disclosure and Additional Information Regarding Risks as at December 31, 2017](#), and [the Annual Financial Statements for 2017](#).

I. Compliance risk

Compliance risk is the risk of imposition of a legal or regulatory sanction, material financial loss, or reputational damage which the banking corporation may suffer as a result of a failure to comply with the compliance directives, as defined in Proper Conduct of Banking Business Directive 308.

Pursuant to Proper Conduct of Banking Business Directive 308, compliance risk also includes risks related to the fairness of the Bank towards its customers, conduct risk, conflicts of interest, the prohibition of money laundering and financing of terrorism, provision of advice to customers, protection of privacy (excluding information-technology aspects), and taxation aspects relevant to products or services for customers.

In addition, the risks arising from the investigations by United States authorities, as described in Notes 10C and 10D to the Condensed Financial Statements as at March 31, 2018 are also to be noted.

For additional information regarding compliance risk and the management thereof, see [the Report on Risks: Pillar 3 Disclosure and Additional Information Regarding Risks as at December 31, 2017](#) and [the Annual Financial Statements for 2017](#).

J. Legal risk

Risk to the Group's income and capital resulting from unexpected events such as legal claims, including class-action suits, inability to enforce contracts, or rulings against the Group, which may cause damage to the Group's profitability. The Group has a structure of internal and external legal counsel.

For additional information regarding legal risk and the management thereof, see [the Report on Risks: Pillar 3 Disclosure and Additional Information Regarding Risks as at December 31, 2017](#); [Note 26 to the Annual Financial Statements for 2017](#); and [Note 10 to the Condensed Financial Statements as at March 31, 2018](#).

K. Reputational risk

Reputational risk is defined as present or future risk of damage to income or capital as a result of a negative image in the eyes of relevant stakeholders, such as customers, parties to transactions, shareholders, investors, or regulatory agencies.

For additional information regarding reputational risk and the management thereof, see [the Report on Risks: Pillar 3 Disclosure and Additional Information Regarding Risks as at December 31, 2017](#), and [the Annual Financial Statements for 2017](#).

L. Regulatory and legislative risk

Regulatory risk is risk to the Group's income and/or capital arising from legislative processes and/or draft directives of various regulatory agencies that cause changes in the Group's business environment. Such changes may occasionally influence the Group's ability to offer certain services and/or may obligate the Group to carry out technological and other investments at considerable cost, while disrupting schedules for development of other planned services.

For additional information regarding regulatory and legislative risk and the management thereof, see [the Report on Risks: Pillar 3 Disclosure and Additional Information Regarding Risks as at December 31, 2017](#) and [the Annual Financial Statements for 2017](#).

For details regarding material regulatory initiatives with an effect on the activity of the Bank during the reported period, see [Note 16 to the Condensed Financial Statements as at March 31, 2018](#), and [Section 3.14 of the Report of the Board of Management and Board of Directors as at March 31, 2018](#).

M. Economic risk

Risk factors in the economic environment are identified by the Economics Department, which tracks current economic and financial data in Israel and worldwide and professionally evaluates the implications of the data. The department maps potential risks in the economy and in the financial markets, and reports to the relevant teams and committees.

For additional information regarding economic risk and the management thereof, see [the Report on Risks: Pillar 3 Disclosure and Additional Information Regarding Risks as at December 31, 2017](#) and [the Annual Financial Statements for 2017](#).

For details regarding conditions in the Israeli and global economy, see [the section "Economic review" in the Report of the Board of Directors and Board of Management as at March 31, 2018](#).

N. Strategic risk

Strategic risk is material present or future risk to profits, capital, reputation, or status that may be caused by changes in the business environment; faulty business decisions; improper implementation of strategy or business decisions; or failure to respond to changes in the industry (e.g. competitors' actions), the economy, or technology. Strategic risk is a function of the congruence of the organization's strategic objectives with its environment, adaptation of the business plans that it develops to achieve these objectives, resource allocation, and quality of implementation.

For additional information regarding strategic risk and the management thereof, see [the Report on Risks: Pillar 3 Disclosure and Additional Information Regarding Risks as at December 31, 2017](#) and [the Annual Financial Statements for 2017](#).

O. Environmental risk

Environmental risk to the Bank is the risk of loss as a result of directives related to the protection of the environment and the enforcement thereof, which may materialize if the Bank bears direct responsibility for an environmental hazard, including the possibility that the Bank may be required to remove an environmental hazard, or may be liable to a third party in respect of an environmental hazard, or as a result of the impairment of realized collateral. This risk may also materialize indirectly as a result of the deterioration of the financial condition of another entity due to environmental costs stemming from directives related to the protection of the environment. Reputational risk may also materialize as a result of the association of the Bank to a party causing environmental damage.

For additional information regarding environmental risk and the management thereof, see [the Report on Risks: Pillar 3 Disclosure and Additional Information Regarding Risks as at December 31, 2017](#), and [the Annual Financial Statements for 2017](#).

P. Addendums

P.I. Securitization exposures

The volume of the Bank's exposure in respect of securitization is approximately NIS 176 million, arising from liquidity lines.

The Bank supplies liquidity lines to securitization entities in which third parties serve as the sponsors. The lines supplied by the Bank constitute a relatively small share of the total liquidity lines of these securitization entities. The Bank does not supply credit reinforcement to these entities. The total liquidity lines supplied to securitization entities, as described above, as at March 31, 2018, amounted to NIS 176 million (approximately USD 50 million), compared with NIS 173 million (approximately USD 50 million) at the end of 2017. No withdrawals were performed on any of these lines up to March 31, 2018.

The risk weight applied to the amount of the exposure is determined according to the highest risk weight assigned to a single exposure covered by the instrument.

Oded Eran

Chairman of the
Board of Directors

Ari Pinto

President and
